🌻 Source Interview with Participant 001

ID: ABC-123 custom_Country: Kenya | custom_Gender: Female | custom_Age: 34

Links from this source:

[ABC-123-1] Lack of resources → Poor school performance Context: "We don't have enough books or supplies. The children struggle because..."

[ABC-123-2] Teacher training → Better outcomes Context: "When teachers receive proper training, we see improvements in..." ```

Best for: Questions about causal relationships you've already coded, comparing patterns across sources, analyzing specific demographic groups using Source Groups filters.

Key advantages of Link Contexts mode:

- Uses your coded causal structure, not just raw text
- Respects all your filters (Sources dropdown + Source Groups)
- Includes source metadata in AI context (country, demographics, etc.)
- More focused and structured than full text search
- Automatically scales to large datasets (>500 links) using backend semantic search

etc etc
